Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/817,076	Applicant(s) CHERON, ERIC	
	Examiner Jinsong Hu	Art Unit 2154	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-9 are presented for examination.
2. Abstract in the disclosure is objected to because it is only a copy of claim 1.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is uncertain the items in the claim which BPP0-BPP4 refer to. Correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Parise et al. US 5,481,750.

7. As per claims 1 and 3-6, Parise teaches the invention as claimed including a process for assembling a group of networked elements controlling equipment of a building, wherein when the elements are in a learning mode [col. 1, lines 10-22], a first action exerted on one of the elements is interpreted as an interrogation concerning its state of membership in the group (included--excluded) and triggers the emission of an information signal regarding its state [i.e., the state is request for the allocation of address, col. 1, lines 32-52; col. 2, lines 23-35; col. 4, lines 40-45], and a following action exerted on this element is interpretable as an order for modifying its state of membership in the group [col. 4, lines 60-62].

8. As per claim 2, Parise teaches the element emits this information signal during a timeout (T') [col. 2, line 59 – col. 3, line 6].

Art Unit: 2154

9. As per claim 7, Parise teaches a pulse engendered manually on a programming means (BPP0, BPP1, BPP2, BPP3, BPP4) relating to this element [col. 2, lines 23-43].

10. As per claims 8 and 9, since they are system claims of claims 1-7, they are rejected for the same basis as claims 1-7 above.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Knebel et al. US 2004/0093399, Wolf US 6,707,828 and Branton Jr. et al. US 6,061,332 disclose network elements installation method.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (571) 272-3965. The examiner can normally be reached on 8:00 AM - 5:30 PM.
